Prudence Lebogang Mohlamonyane

CEO / FOUNDER

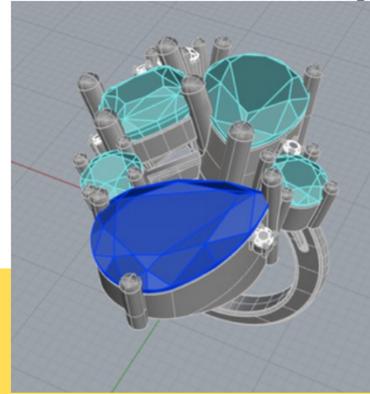

Having trained jewellery manufacturing courtesy of a learnership programme in South Africa Lebza The Jeweller Mohlamonyane experienced vast students or individuals whom were also benefiting from the South African free education system.

Jewellery manufacturing is a highly regulated industry and our country is also rich in precious minerals.

After conducting research, Lebza The Jeweller realized the gap between the time it takes to get funding for skills development of a highly demanded and valuable skill; versus getting absorbed by the jewellery manufacturing industry (employment) after graduating.

Unemployment rate of qualified citizens in South Africa keeps increasing; hence the Goldsmith & Rough Diamond Evaluator's focus is in alignment with the Sustainable Development Goals 2030. To enable a decrease of the unemployment rate mainly within the jewelry industry, and or qualified jewellery manufacturers. All persons, women, men, and persons with disability; and Equal work for Equal Value. While practicing Responsible Extraction & Consumption of these minerals; Also partnering with both the government and private sector to achieve this vision. Globally- AGENDA2063.
